BERNDORF METALL- UND BÄDERBAU GMBH
Leobersdorfer Strasse 26; A-2560 Berndorf

Ajaccio, le 19 décembre 2019

To whom it my concern,

When designing my Hotel Ibis Styles in Ajaccio on Corsica I decided I wanted to offer something special to my guests. I had the idea of a roof top pool overlooking the harbor of my town.

In my research I went to visit various stainless steel pools in Austria, Germany and Switzerland. Berndorf's pools caught my attention. Their products looked most developed down to the smallest detail. I personally love good design and I pay very close attention to details myself. On one of my trips I went to visit their facilities in Austria. Berndorf's offices and workshops looked most professional and organized.

Looking back, I am very glad I chose for a Berndorf pool. Working with their team was a great experience. Whenever I had an idea for a custom made design element they took it on board and presented a practical solution for it. Together we developed those details and incorporated them into the project.

The coordination of the works and installation on site was very smooth and went very well. Their installation teams were polite, respectful and forthcoming. The project manager was always available whenever additional information or coordination was required.

Now that the pools are in operation, all our guests are very excited about them. The feedback we get is tremendous. They love the experience as well as design. Our hôtel won since it was opened 3 times the Accor Quality Prize for the Côte d'Azur and Corsica area.

After this completing this project with Berndorf, I can strongly recommend Berndorf and their products to anyone who wants to have a high quality pool. For the coming years I already have some new project ideas which I am developing just now and I would like to work with them again.

Best regards,
